

Round the grounds

Many UK independent schools represent not only the pinnacle of learning for students and staff but also some of the most spectacular and picturesque educational environments in the world

Large estates provide many benefits and allow schools to maximize their outdoor and recreational activities. In addition they can deliver strong statements about the school in respect of security, environmental harmony, and for boarders the quality of their home throughout the term.

Proper maintenance of estate grounds remains an important aspect on any manager's agenda and equipping your grounds team with the best tools to do the job is essential. Rolling acres

of countryside, sports and playing fields, arable or livestock farm land, woodland, lawns, fencing, the list is extensive.

The following is a small sample of vehicles we have selected that have applications for estate or grounds maintenance. The figures quoted are based on a three year 36,000 mile contract hire agreement which reflect significant savings and easily budgeted costs. Outright purchase and lease purchase quotations are available on request.

Please contact Arthur Anderson for any alternative vehicle or individual finance quotation.

These examples are based on a three year 36,000 mile contract hire with one advance rental followed by thirty five.
